SUMMARY

Motivated B.Tech Computer Science student with strong foundations in programming, data structures, and computer networks. Skilled in building full-stack applications using modern frameworks, real-time communication systems, and working with backend systems using Node.js and SQL. Familiar with Linux environments, Bash scripting, software quality assurance, and containerized deployments.

EDUCATION

Pranveer Singh Institute of Technology	2023 – 2027
B.Tech in Computer Science	Percentage: 64.60% (CGPA: 5.818)
NLK Inter College	2022
Intermediate	
NLK Inter College	2020
High School	

PROJECTS

Stock Market Sentiment Analysis

Stock market sentiment analysis using a Transformer involves:

- **Input:** Feeding financial texts (news, social media, reports) into a pre-trained Transformer model, like FinBERT.
- **Processing:** The model's self-attention mechanism weighs the importance and context of each word.
- **Output:** It classifies the text's overall sentiment as Positive, Negative, or Neutral, generating a score. This sentiment score is then used as a feature to predict future stock price movements.

Cryptocurrency Real Time Tracker

Website Link - <https://spectacular-sunflower-b6350e.netlify.app/>

- **Real-Time Tracking:** Functions as a live cryptocurrency exchange rate tracker.
- **Data Provision:** Provides up-to-the-minute market data for various digital assets
- **Key Metrics:** Displays crucial financial details, including current prices, trading volumes, and market capitalization (market cap).
- **Purpose:** Designed to help users monitor price fluctuations, compare asset performance, and track overall market trends.
- **Technology UX:** Built on modern web technologies, featuring a clean and responsive interface for efficient use.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL

Web & Backend: HTML, CSS, React.js, Next.js, Node.js, Express.js, Tailwind CSS

Testing & QA: Playwright, E2E Testing, CI/CD, GitHub Actions

Database: PostgreSQL, MongoDB, SQL

Tools: Git, Linux, Docker, Kubernetes, Bash Scripting, VS Code

Core Subjects: Data Structures, DBMS, Computer Networks, System Architecture

ACHIEVEMENTS

- Won 1st place in Tug of War competition at college sports event.
- Built and deployed full-stack and real-time applications using modern web frameworks.
- Actively practicing problem solving and strengthening core CS fundamentals.
