SUMMARY

Motivated B.Tech Computer Science student with strong foundations in programming, data structures, and computer networks. Skilled in building full-stack applications using modern frameworks, real-time communication systems, and working with backend systems using Node.js and SQL. Familiar with Linux environments, Bash scripting, software quality assurance, and containerized deployments.

EDUCATION

Pranveer Singh Institute of Technology

B.Tech in Computer Science

Percentage: 83% | 2023 – 2027

NLK Inter College

Intermediate

71.8% | 2022

NLK Inter College

High School

81.83% | 2020

PROJECTS

Full-Stack Real-Time Chat Application

Next.js, Node.js, Express.js, Socket.io, PostgreSQL, JavaScript, Docker, Tailwind CSS, Zod

- Architected a scalable, full-stack real-time chat application using Next.js on the frontend and an Express/Node.js server backed by PostgreSQL.
- Implemented low-latency, bi-directional communication using Socket.io for instant messaging and real-time state updates across clients.
- Ensured end-to-end quality with strict type safety (JavaScript, Zod) and integrated secure authentication (Clerk) and media handling (Cloudinary).
- Containerized the database environment using Docker and docker-compose to guarantee consistent, isolated development and testing.
- Designed a highly responsive and accessible user interface utilizing Tailwind CSS v4 and Radix UI components.

E-Commerce E2E Automation Framework (SauceDemo)

Playwright, JavaScript, GitHub Actions, CI/CD, Page Object Model (POM)

- Architected a robust E2E testing framework utilizing Playwright, JavaScript, and the Page Object Model (POM) pattern for high maintainability.
- Developed automated test scripts for critical user journeys including authentication, product catalog navigation, cart management, and checkout.
- Eliminated test flakiness with dynamic auto-waiting and configured cross-browser testing alongside automated HTML reporting.
- Integrated CI/CD pipelines using GitHub Actions to automatically trigger test runs on every push and pull request, preventing regression bugs.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Web & Backend: HTML, CSS, React.js, Next.js, Node.js, Express.js, Tailwind CSS

Testing & QA: Playwright, E2E Testing, CI/CD, GitHub Actions

Database: PostgreSQL, MongoDB, SQL

Tools: Git, Linux, Docker, Kubernetes, Bash Scripting, VS Code

Core Subjects: Data Structures, DBMS, Computer Networks, System Architecture

ACHIEVEMENTS

- Completed online courses in Web Development, Python, and Linux fundamentals.
- Built and deployed full-stack and real-time applications using modern web frameworks.
- Actively practicing problem solving and strengthening core CS fundamentals.
