SUMMARY

Passionate software developer with a strong interest in building user-friendly applications. Seeking an opportunity to apply my skills, learn from experienced professionals, and contribute to real-world projects while growing as a developer. Open to relocation across India and available for immediate joining.

EDUCATION

Pranveer Singh Institute of Technology	2023–2027
B.Tech in Computer Science and Engineering (AI/ML)	CGPA/Percentage: 64.58%
N.L.K Inter College	2022
Intermediate	
N.L.K Inter College	2020
High School	

PROJECTS

Stock Market Sentiment Analysis

- Built a financial sentiment analysis pipeline using the pre-trained **FinBERT** Transformer model to analyze financial news, social media posts, and reports.
- Utilized **self-attention** to capture contextual relationships and identify the importance of financial terminology within text.
- Classified financial text into **Positive, Negative, and Neutral** sentiments and generated sentiment scores as features for stock market analysis.
- Tech Stack:** Python, Hugging Face Transformers, FinBERT, PyTorch, Pandas, NumPy, NLTK, Scikit-learn, NLP, Machine Learning.

AI Resume Analyzer – ATS Scoring Platform

- Built a data pipeline that parses PDF resumes with **PyMuPDF**, extracts structured fields, and scores them against job description keywords to compute an ATS compatibility score.
- Compared resume data against job description requirements to identify matched vs. missing skills, presenting the analysis to the end user.
- Built the supporting **FastAPI (Python)** backend and **React + Tailwind CSS** Frontend, deployed with **Docker**.
- Integrated the **Gemma 3 LLM via Ollama** for local AI-generated feedback based on the scored data.
- Tech Stack:** Python, PyMuPDF, FastAPI, React, Tailwind CSS, Axios, Ollama, Docker, REST API.

House Price Prediction Model – AccPrice House

- Developed an end-to-end **Machine Learning pipeline** for house price prediction in the **NY Tri-State area**, from data collection to model evaluation.
- Built a scalable **Scrapy web scraping pipeline** to collect and process real estate listing data.
- Implemented **data preprocessing and feature engineering** to clean, normalize, and transform raw property listing data.
- Trained and evaluated a **Random Forest Regression** model to predict house prices using property attributes and engineered features.
- Tech Stack:** Python, Scrapy, Pandas, NumPy, Scikit-learn, Random Forest, Machine Learning.

TECHNICAL SKILLS

Programming Languages: C, C++, Python

Database: MySQL, Microsoft SQL Server

AI/ML: Transformers, Hugging Face, LLM Integration (Ollama), PyMuPDF

Tools & Platforms: Git, GitHub, Docker, VS Code, Unit Testing

Core Subjects: Data Structures and Algorithms, OOP, DBMS, Computer Networks, Operating Systems

CERTIFICATIONS

- Programming Fundamentals using Python – Part 1**, Python
- Introduction to Databases with SQL** – Harvard University (CS50)

ACHIEVEMENTS

- Solved 100+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- Regularly solve Data Structures and Algorithms problems on competitive coding platforms.
